Aurora Aluminium Doors

Practicality in design.

The Aurora aluminium doors are manufactured to suit a vast variety of applications. Sections have been engineered and reinforced for high commercial use and premium operation. A customized machining service is available to install all types of furniture and accessories prior to delivery. Glazing pocket on the Aurora Aluminium Doors has been designed to incorporate glazing rubber. This ensures the door

can be pre-glazed prior to installation and provides a small consistent bead around the glass opening. Aurora Aluminium Doors can be incorporated into the Cascade sliding systems offering further design flexibility.

Features of Aluminium Doors

- Includes narrow and wide stiles;
- Machining and fitting of door furniture;
- Option of Rubber Glazing prior to delivery;
- Suits a vast range of acoustic and weather seals;
- Available in a range of powder coat and anodise finishes; and
- Glazing pocket accepts either rubber or silicone glazing options.

Aurora Timber Doors

Practicality in design.

The Aurora Timber Doors offer endless possibilities in size, construction and style. A diverse range of options is readily available including; vision panels, machining for hardware, specialised cladding and veneers.

Our stringent quality control procedures maintain a superior level of product integrity, essential in commercial and high end residential applications. The range includes sliding doors further complimenting the Cascade Sliding Systems.

Features of Timber Doors

- Quality commercial grade construction;
- Large range of stock doors;
- Exceptional turnaround time on custom sizes;
- Custom machining for associated hardware and seals;
- Viewing panels with a wide range of glass types;
- Variety of veneers available; and
- Fire rated doors.

Optilite®

Practicality in design.

The Optilite door vision panel is an innovative glazing concept. The pre-glazed feature of the Optilite eliminates the tedious process associated with traditional glazing, particularly in fitting of panels into an existing or prefinished door. The Optilite offers many advantages over alternative methods of glazing.

Available in a wide range of stock sizes, and manufactured with a variety of sizes, glass types and frame finishes. Optilites are an effective means of satisfying a broad range of safety requirements.

Features of Optilite

- Glazed in 6.38 clear laminate glass according to glazing code;
- Suit a range of door thicknesses – 32 to 48mm;
- Safety benefits;
- Custom sizes;
- Fully assembled pre-glazed unit; and

- Stocked in natural anodised finish and available in a wide range of sizes:
300 x 200
600 x 200
600 x 300
600 x 600
900 x 200
900 x 600
1700 x 200
- The above stock sizes are actual cut out sizes.

Vent Flow®

Practicality in design.

The aluminum Vent Flow air relief grilles are vital for air flow and air conditioning. The vents are supplied as a fully assembled unit ready for quick installation. The front and back frames are locked together by a strong metal clip which is fully concealed between the frames, eliminating unsightly fixings. The vents can be made to suit your specific size requirements and are available in a range of powder coat and anodise colours.

Features of Vent Flow

- Free air flow of 56%;
- Suits door thicknesses of 30- 48mm;
- Custom made sizes and colours;
- Suits aluminum and timber doors; and

- Stocked in natural anodised in a wide range of sizes:
600 x 150
600 x 200
600 x 250
600 x 300
600 x 450
600 x 600
The above stock sizes are actual cut out sizes.

Chromis® Entrance

Practicality in design.

The Chromis Entrance Handles are designed and developed to suit both industrial and residential use. Utilizing only commercial grade Stainless Steel ensures the Chromis Entrance will improve the outcome of any situation. A variety of styles are stocked and custom sizes can be fabricated in exceptional turnaround times.

Features of Chromis Entrance

- Commercial Grade Stainless Steel;
- Modern designs; and
- Variety of fixing options.

Aurora Associated

Practicality in design.

The Aurora Associated includes a vast array of door accessories to cover all your requirements. The range has been carefully designed in view of streamlining the installation process, whilst maintaining the architectural finesse. The selection includes; Lever Sets, Hinges, Door Stops and a variety of other premium products.

Features of Aurora Associated

- Large variety stocked;
- Designed and manufactured for commercial use; and
- Available in a range of sizes and finishes.
